

Technical Theater Roles Assignment

Name: _____

Please complete this assignment and turn it into Mrs. Pratt on Tuesday, February 5. This is a graded assignment.

All links and videos referenced below are available on Mrs. Pratt's website at pratt.kwoods.org on Integrated Art/The Tempest page.

1. Please view the *Peter and the Starcatcher Act 1 Finale* video. *Peter and the Starcatcher* is a play that explores the story of Peter Pan and the Lost Boys before the Peter Pan story as we know it. In this clip, Peter and Molly (a starcatcher apprentice), who have just recently met, are aboard the Pirates ship, sailing to Never Land to find a land safe from evil. *Peter and the Starcatcher* does a great job of integrating technical elements to develop the story and does things in a creative way with minimal equipment.

Please explain where you saw the different technical elements throughout the video (lighting, set, sound, costumes, makeup, special effects, props) and how they helped explain or move along the story. Please address at least 4 different elements.

2. Please read through the technical theater roles handed out in class. Another copy is available on the course website if needed.

Please choose a first and second choice role from the list below. For your first-choice role, please view the videos on my website attached with that role and explain why you feel you would be a good fit for that role as well as include some notes from your viewing of the videos.

You will not be granted your choice of roles if you do not do your research and view the videos.
